Professional Synopsis

From the inception of my career, it was evident that I wanted to be involved in the creative field. I have always been amazed at how design, motion and our feelings blend to create masterpieces of artistic, aesthetic and functional brilliance. It is this desire that made me want to become a graphic artist.

With over ten years of experience in the creative field, I have an extensive artistic background in design and a passion for creative exploration. Collaborating the latest design methodologies and bringing about my ideas into reality with efficient time management. As a dynamic worker, I am able to work under pressure, interact and befriend clients and build customer relationships. Adhere to tight deadlines and perform multiple tasks.

I believe that design and creativity is only bound by our imagination. And I will pursue and venture on to find new methods and technologies to create better user experiences that create results for my clientele. I utilize my knowledge for the benefit of the organization, while developing my career by accepting challenges, delivering quality output on time, continued learning, and being a good team player.
